Well-Being – this is linked to the first of the 5 ways to well-being

Take Notice

Reminding yourself to 'take notice' can strengthen and broaden awareness.

Studies have shown that being aware of what is taking place in the present directly enhances your well-being and savouring 'the moment' can help to reaffirm your life priorities.

Heightened awareness also enhances your self-understanding and allows you to make positive choices based on your own values and motivations.

Take some time to enjoy the moment and the environment around you. Here are a few ideas:

- Take a walk around your garden or outside space. Really look at what's there. What have not noticed for the first time?
- Have a 'clear the clutter' day
- Take notice of how your family are feeling or acting
- Eat lunch in a new place – in the garden, make a tent from the table and a sheet and eat in there – let your imagination go wild!

English

Continue to read as much as you can.

Complete the English daily sessions for Year 6 on The Oak National Academy.

<https://www.thenational.academy/online-classroom/schedule/#schedule>

These resources may help you:

<https://home.oxfordowl.co.uk/books/free-ebooks/>

If you finish this, have a go at the English Super Challenges.

Mathematics

Make sure you can count up and down in multiples of 6, 7, 9, 11 and 12.

This week, we're going to move onto beginning to look at ratio. Ratio shows the relative size of two or more values. Have a look at the poster in the resources, then work through the PowerPoint, noting the different ratios of the values.

For your task, find different objects around your home and calculate the ratios – if you have 6 pieces of pasta and 18 tomatoes, the ratio would be 6:18, which then simplifies to 1:3 (this links to your knowledge of multiples and factors). Record your findings in your exercise book or on paper.

If you finish this, have a go at the Maths Super Challenges.

Home Learning Activities

Year Group: 6

Week beginning: 11.05.20

Science - Living things and their habitats

Watch this video that explains more about life cycles of plants, mammals, birds, insects and amphibians.

https://www.youtube.com/watch?time_continue=368&v=CH_YkA6Deo4&feature=emb_title

Choose one type of animal (not plant) and create an illustrated poster to demonstrate its life cycle. I've included some examples in your resource pack – don't just copy them! You might want to do some extra research to supplement what you learn from the video.

RE – What does it mean for Muslims to follow God?

Research more about the pillar of sawm (fasting). We are currently in the Muslim festival of Ramadan – watch this video to find out more:

<https://www.youtube.com/watch?v=W94SdiWhtr8>

I want you to imagine you're a Muslim taking part in Ramadan. Write a short diary entry about your day. Think about how the fasting has made you feel and what it has made you think about – there are some ideas in the video to get you started. Think about how this act brings you closer to God (Allah), and what it means to you. Then design the meal you'd want to eat after fasting all day. You might want to research traditional foods eaten by Muslims around the world during this festival.

Topic – Crime and Punishment

Read through the information PowerPoint about Anglo Saxon crime and punishment. Make notes of interesting facts that you pick up as you go along. Use the Wergild cards to label a member of your family with the money they would be owed – which one is the most? Then answer the questions at the end of the PowerPoint – record your answers in your exercise book.

Don't worry about printing the cards, you can just complete the activity by looking at them on the screen.
