

For English, please have a go at the following activities:

- Read a copy of 'The Highwayman' (attached) - create an illustration based on what you know and can infer from the poem
- Research unfamiliar vocabulary from the poem and create a Highwayman dictionary
- Write a set of instructions for how to play your favourite game
- Use the common exception word document (attached) to create some silly sentences whilst practising your spellings
- Design a new front cover and blurb for your favourite book
- Write a non-fiction text based on your findings from research about crime and punishment through the ages

## CLASS 4—HOME WORKING LIST

Our new History topic is 'Crime and Punishment'. Why not have a go at some of the following activities:

- Research different punishments handed out for criminals in the UK over the centuries and record them as a spider diagram
- Research what life was like in Victorian prisons and create a labelled diagram
- Compare what you have found out with modern punishments—make a table to compare similarities and differences

Whilst this time of school closure means us asking you to work from home, please also take time to do the things you enjoy—these activities aren't an exhaustive list so if you have other ideas we would love to hear about them when we return to school.

We will aim to keep you fully up to date with the situation of school closures as and when we receive information from the Department for Education.

Should you need to contact me during the closure, please email [class4@masham.n-yorks.sch.uk](mailto:class4@masham.n-yorks.sch.uk)

This email account will be monitored between the hours of 9am-11am Monday-Friday, by the class teacher, during the duration of the school closure. Should staff become ill and unable to monitor this an out of office reply will be set up to keep you informed. Once schools re-open these email accounts will be suspended.

For maths, please have a go at the following activities:

- Practise column addition and subtraction (Y4—4 digits, Y5—up to 6 digits, Y6—beyond 6 digits)
- Play times table bingo with your family—one of you could be Mr Scott!
- Play maths based games such as dominoes or Monopoly
- Create a picture including a repeating pattern
- Use kitchen scales and measuring jugs to practise reading scales with not all measurements given
- Complete online challenges on Times Table Rock Stars
- Complete daily lessons on <https://whiterosemaths.com/homelearning/>
